

Use of hourly allocations for network access points in the ONTRAS market area

Balancing group manager: _____

Contact: _____

Email/phone: _____

Balancing group network op.: ONTRAS – VNG Gastransport GmbH

Please note that allocation data is not relevant for invoicing and is used solely to improve the forecasting capabilities of the balancing group manager.

In accordance with Part C. VIII of the Supplementary Conditions of ONTRAS, the balancing group manager receives hourly allocation data for the following network access points to ultimate consumers for the preceding hour (h+1), broken down by balancing groups.

No.	Metering point (DE_NNNNNN_YYYYY_XXXXXXXXXXXXXXXXXXXX)	Network access point to end consumer	Balancing group no. or sub-(sub-)balancing group no.	Start	End	Data polling*		
						land line	Mobile	Incl. in metering equipment
