

Use of the time-offset control in the ONTRAS market area

Balancing group manager: _____
 Contact person: _____
 Email / Phone: _____
 Balancing group number: _____
 Balancing group network operator: ONTRAS – VNG Gastransport GmbH

Please note that, in accordance with number 3 part C.IV of the Supplementary Conditions of ONTRAS, the exit capacities relevant for the time-offset control must be included in a separate balancing group.

The balancing group manager uses in accordance with part C. IV. of the Supplementary Conditions of ONTRAS the substitute nomination procedure of the time-offset control for the following network connection points to the end-consumers:

Posn.	Network connection point number (DE_NNNNNN_YYYYY_XXXXXXXXXXXXXXXXXX)	Network access point to end-consumer	Exit network operator	Begin	End	Data polling*		
						land line	Mobile	Incl. in metering equipment
1								
2								
3								
4								
5								
6								
7								
8								
9								
10								

* Please tick as appropriate

The measurements at the abovementioned end-consumer network connection points are to be used as nomination within scope of the time-offset control for the following entry point (virtual trading point is possible) in the ONTRAS market area:

Entry point: _____

The service partner has been authorized by the balancing group manager to make the hourly measurements available to ONTRAS. This data is to be used for the purpose of the time-offset procedure according to part C. IV of the Supplementary Conditions of ONTRAS.

Contact person of the service partner (Contact details) is: _____
