## News from ONTRAS

### Latest notifications

Welcome to the renewed ONTRAS customer portal

25.04.2025

We have revised the ONTRAS customer portal to meet your requirements even better. Discover the optimized functions and extended options. As always, we will be happy to answer your questions by phone, e-mail or directly by message using the button at the bottom right.

# New homepage in the logged-in area

Display maintenance: View all current maintenances and future dates directly.

## Maintenances i

Network Point		From	To	Firm Capacity	Interruptible Capacity
VGS Storage Hub	<a href="#">Entry</a>	01.07.2025	05.07.2025	19.297.923 kwh/h	0 kwh/h

Display services from our portfolio that may also be relevant for you.

## Our services

Technical quantity determination incl. K-number correction.

We support you in all questions relating to data reading, plausibility checks, substitute value formation, energy quantity determination and the dispatch of measurement data or allocation values in coordinated market formats. The K-number correction:

[What is it and when is it needed?](#)

## Safety and health coordination

Our subsidiary INFRACON offers you the services of the safety and health coordinator in the field of planning and construction, which offers the opportunity to incorporate safety and health aspects into your project holistically from the planning phase.

[Safety and health coordination - SiGeKo](#)

## Complete solution for biomethane projects

Everything from a single source: Our subsidiary INFRACON supports you in all phases of your biomethane project, from project management to planning and construction of the feed-in system to operation.

# Service provider feature

This feature enables external service providers to process internal orders on behalf of their customers and to report and view billing data and biogas costs. This makes the process more transparent and simpler for both the service providers and for you.

## Service provider feature – Activate as an existing portal user

---

If you already use the ONTRAS portal and would like to use the new service provider function, please proceed as follows

1. Complete the ONTRAS [registration formular](#) for the company for which you are providing the service
2. Please enter your data in the “authorized person” field
3. Have the document signed by the company for which you are providing the service
4. Send it to ONTRAS

ONTRAS will then check your request and activate the function for the company for which the request was received. The company, for which you are providing the service, will NOT be registered twice.

# Roles and authorizations

Extension requests can now be made directly via the portal - easier and faster.

Both new roles and new functions/authorizations can be requested via the “Edit permissions” menu item. Possible combinations:

	Transport customer/ balancing group manager	Network operator	network access customers/ users
Accounting Data	✓	✓	✓
Indicative Values	✓	✓	✓
Balancing group management	✓		
Nomination	✓		
Biogas cost allocation		✓	
Internal order/ Quantity declaration		✓	

# Delimit and deactivate balancing groups (for Transport customers/Balancing group managers)

The screenshot displays the ONTRAS Balancing group management interface. The top navigation bar includes the ONTRAS logo, a search bar, and user information (Company 1, User, Logout, EN). The main content area features a table of balancing groups with the following columns: Balancing Group Code, Runtime, Balancing Group Manager, Authorized Companies, Biogas, Inclusions, and Actions. A green arrow points to the row with Balancing Group Code THE0BFH010012027.

Balancing Group Code	Runtime	Balancing Group Manager	Authorized Companies	Biogas	Inclusions	Actions
THE0BFH010012025	ongoing 10.04.2024 - 01.05.2100	Company 1			✓	
THE0BFH901032024	ongoing 18.06.2024 - 01.10.2100	Company 1	Company 2		✓	
THE0BFH901032035	ongoing 26.03.2025 - 01.10.2100	Company 1				
THE0BFH010012027	ongoing 22.08.2024 - 01.10.2100	Company 1			✓	
THE0BFH023012021	ongoing 15.05.2024 - 01.10.2100	Company 2	Company 1		✓	

Shippers and balancing group managers can make the following changes to balancing groups assigned to them:

- delimit/deactivate them for a date in the future
- send a balancing group change to ONTRAS in order to transfer the change to the RBP and PRISMA capacity booking platforms

# View and export capacity contracts

The screenshot displays the ONTRAS web application interface. On the left is a navigation menu with categories like Home, 24/7 Emergency contacts, Biogas cost allocation, and Capacity contracts. The main content area is titled 'Capacity contracts' and features a search bar and several filter dropdowns (Status, Capacity Type, Flow Direction, Interruptibility, Contract Type, Transactions Type). Below the filters, there are 17 items listed in a table. A red box highlights the 'Export Contracts' button. A green arrow points from this button to a detailed view of a 'Capacity Contract'. This detailed view includes a 'Back' button, an 'Export Contract Details' button (also highlighted in red), and a table of transaction fees.

**Capacity contracts**

# Network map in the transparency tool

The screenshot displays the ONTRAS transparency tool interface. At the top, there is a navigation bar with 'Transparency data', 'Overview', 'Network information', and 'Maintenances'. Below this is a search bar and a filter menu with 'ALL', 'ENTRY', and 'EXIT' options. The main area is divided into three panels:

- Network Map:** A map showing various network points like UGS Kraak, Steinitz, UGS Peckensen, UGS Staßfurt, TEP Storage Hub, Leipzig (highlighted in yellow), Berlin, GCP GAZ-SYSTEM/ONTRAS, and others.
- Current and future maintenance:** Two panels for 'VGS Storage Hub'. The left panel shows 'Entry' maintenance from 01.07.25 to 05.07.25. The right panel shows 'Exit' maintenance from 12.09.25 to 15.09.25. Both panels include details like EIC Netpoint (21W0000000000427), Network operator (ONTRAS Gastransport GmbH), and Market area (Trading Hub Europe).
- Network information:** A sidebar with a search bar and a list of network-specific transparency data links: Actual physical flows, Aggregate Nominations Entry, Aggregate Nominations Exit, Aggregate Allocations Entry, and Aggregate Allocations Exit.

- Overview of all network points including maintenance information
- Filter and search function for network points incl. favorites function
