Leipzig, 7. August 2020

## **PRESS RELEASE**

### **ONTRAS successfully markets capacities on the booking platforms PRISMA and RBP every day**

Since the yearly auction in July 2020, ONTRAS has been marketing capacities on the two booking platforms PRISMA and RBP (Regional Booking Platform) every day.

The Hungarian RBP is used for primary and secondary marketing of capacities for the GCP GAZ-SYSTEM/ ONTRAS network point on the German-Polish border. ONTRAS still markets all the other network points via the European PRISMA platform. The results of all auctions as well as of the quarterly auctions at the beginning of August can be found as usual in the ONTRAS [transparency tool](#).

ONTRAS Gastransport GmbH is a national gas transmission system operator in the European gas grid, based in Leipzig. We operate Germany's second longest gas transmission system, with more than 7,500 km of length and about 450 interconnection points and market its capacities. ONTRAS combines as a reliable partner the interests of shippers, dealers, regional network operators and producers of renewable gases. With 22 biogas feed-in plants annually delivering up to 180 Mio. m<sup>3</sup> of biomethane to the gas grid and two hydrogen injection plants ONTRAS essentially contributes towards a CO<sub>2</sub>-neutral energy supply in Germany.
